OTHER INFORMATION

Details of TIA-i fees and charges can be obtained via [Fees and Charges](#)

INVESTMENT STRATEGIES

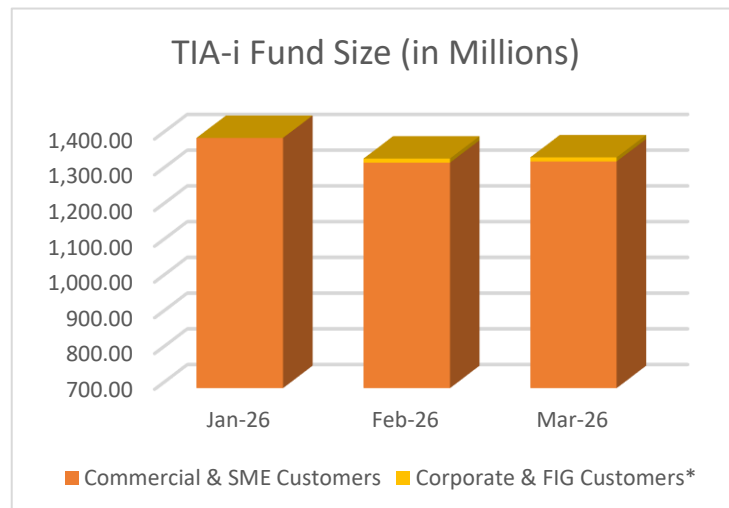

TIA-i returns is closely linked to the performance of the underlying assets; the inherent risk to the principal investment is relatively low given that the risk is managed through a diversified financing portfolio with a low to moderate risk exposure.

Portfolio rebalancing is also executed to ensure the performance of the selected assets is aligned with the fund's strategies and objectives. Any profit generated from the capital is shared between the account holder and the Bank according to a mutually pre-agreed profit-sharing ratio (PSR) whilst financial losses (if any) will be borne by the account holder.

PROSPECT AND OUTLOOK

Malaysia's economic outlook in 2026 is expected to remain resilient, supported by steady domestic demand, sustained investment activities and continued policy focus on economic reform and fiscal consolidation. Private consumption is anticipated to remain robust, underpinned by stable labour market conditions, controlled inflation and targeted government support measures, while public and private investments are expected to continue driving growth, particularly in infrastructure, digitalisation and strategic industries.

The banking and financial services sector is expected to remain stable, with prudent liquidity management and disciplined credit growth supporting overall system soundness. Financing activities are projected to be supported by healthy demand from small and medium enterprises (SMEs) and corporate customers, particularly in sectors aligned with national development priorities such as sustainability, green transition, supply chain resilience and automation.

Within this operating environment, Islamic banking assets are expected to continue expanding, supported by increasing awareness and adoption of Shariah-compliant financing solutions. The Bank will continue to leverage its diversified financing portfolio and prudent risk management practices to sustain stable performance of the underlying assets funded by TIA-i. Asset allocation strategies will remain focused on preserving capital and delivering stable returns, while adapting to evolving market conditions.

Looking ahead, the Bank will continue to support Malaysia's economic agenda by facilitating financing to productive sectors, including sustainable and transition-related activities in line with its Green, Social, Sustainable Impact Products & Services (GSSIPs) framework. The TIA-i fund is expected to remain well-positioned to navigate the prevailing economic landscape and deliver outcomes aligned with its investment objectives, notwithstanding potential external volatility.

RATE OF RETURN

Investors are to take note that the past performance of the fund is not an indication of its future performance. For more details on past performance, quarterly reports on TIA-I since its inception are maintained on the bank's [website](#).
