## PROSPECT AND OUTLOOK

Consumer Banking growth momentum remains on track as the Bank continues to keep close watch on margins, increasing cost of funds and asset quality. Corporate financing growth should show strong results by year-end, backed by a steady deal pipeline. Malaysian capital markets continues to be soft, as seen in the overall decline in equity and debt markets activities year on year, as corporate and investors await the announcement of policies and measures under the new administration.

Overall, based on the current assets performance, the return to the customers recorded an average of 0.22% per annum for period from July 2018 until September 2018. The bank foresees the assets performance to remain stable during 4<sup>th</sup> Quarter of 2018.
